Abstract not available for JP 2005529707 (T)

Abstract of corresponding document: **WO 2004000135 (A2)**

Apparatus for performing a surgical anastomosis include a tubular body having an onion portion formed near the distal end of the tubular body. The apparatus includes a sleeve having a radius sized and dimensioned to slidably receive the tubular body therein. The apparatus includes a plunger assembly sized and dimensioned to be slidably received within the central lumen of the tubular body. The plunger assembly includes a distal end configured and adapted to deploy the onion portion.
